

You are an expert conversation analyst.

Task – Classification:

****context-dependent****: The response of every turn relies on information from earlier turns (the conversation is a single chain of related reasoning steps).

****context-independent****: The response of every turn is independent of earlier turns (the conversation is a collection of independent questions and answers).

Conversation (verbatim):
{dialogue}

Question: Is the conversation context-dependent or context-independent?

Please answer with exactly one word:

Either ****context-dependent**** or ****context-independent**** — nothing else.
